MOBILE APPLICATION DEVELOPMENT PORTFOLIO 2026

Sukdev Adhikary

Senior Mobile Application Developer

Nine-plus years building and shipping production Android and cross-platform applications across agritech, logistics and e-commerce. Native Android in Kotlin and Java, Flutter for multi-platform delivery, with a focus on clean architecture, offline-tolerant field tooling and payment-critical workflows.

Flutter · Android · Kotlin · Java · Jetpack Compose · Riverpod · MVVM · Clean Architecture · Firebase · Google Maps · REST APIs · Payment Gateways

PROFILE

Engineering Profile

I build mobile products that carry real operational weight: farmer onboarding and KYC that has to work on low-end handsets in poor connectivity, procurement and trading flows where money moves, and logistics apps where a driver's location updates drive the whole delivery chain. My work spans both native Android and Flutter, and I move between them depending on what the product needs rather than what is fashionable.

Across these projects I have owned architecture decisions, state management strategy, API integration, payment gateway work, offline data capture and Play Store / App Store release management. Several of the apps below are live in India and Iraq and serve multilingual audiences, including right-to-left Arabic layouts.

9+	7+	iOS + Android	500K+
YEARS EXPERIENCE	APPS SHIPPED	PLATFORMS	COMBINED INSTALLS

CORE STACK

Kotlin · Java · Dart · Flutter · Jetpack Compose · XML Layouts · MVVM · MVI · Clean Architecture · Riverpod · Provider · BLoC · Coroutines · Flow · Retrofit · Room · Hilt / Dagger · Firebase · Google Maps SDK · FCM Push · Payment Gateways · REST / JSON · SQLite / Isar · Git & CI

WHAT I BRING

- **Architecture that survives handover.** Clean Architecture and MVVM applied consistently, with clear separation between data, domain and presentation layers.
- **Field-grade reliability.** Offline-first data capture, GPS and image upload pipelines built for patchy rural connectivity and low-spec devices.
- **Money-critical flows.** Wallets, advance and final payments, negotiations and counteroffers, integrated with third-party gateways and built for auditability.
- **Cross-platform judgement.** Native Android where platform depth matters; Flutter where a single codebase across iOS and Android is the better trade.
- **Localisation at scale.** Multi-language apps spanning English, Hindi, Bengali, Marathi, Telugu and Arabic, including RTL layout handling.
- **End-to-end release ownership.** Store listings, signing, staged rollouts, crash triage and post-release iteration on both Play Store and App Store.

PROJECT 01

Farmneed Pro

Climate-smart agriculture platform for farmers

Farmneed Agribusiness Pvt. Ltd. · *India*

10K+	4.4 / 5	69	Weather
INSTALLS	RATING	REVIEWS	CATEGORY

Native Android · Kotlin · MVVM · Clean Architecture · Retrofit · Room · FCM

A farmer-facing Android application delivering farm-level weather forecasting, disease-risk early warning and expert agronomic advice. Farmers register against their geo-coordinates, select crops and service duration, and receive targeted risk and input-management guidance.

MY CONTRIBUTION

- Built farmer onboarding and KYC capture, including document upload and verification states over unreliable rural connectivity.
- Implemented crop procurement and trading modules with order lifecycle handling.
- Delivered an in-app wallet with payment workflows and transaction history.
- Structured the codebase on MVVM with Clean Architecture boundaries so feature teams could work in parallel without collisions.
- Added a community module with country-wise segmentation and resolved image upload failures and crash clusters reported post-release.
- Extended localisation to include Thai alongside existing Indian languages.

Google Play → **play.google.com/store/apps/details?id=com.app.farmneed**

PROJECT 02

Procure

Spot and futures crop trading for agribusiness

Farmneed Agribusiness Pvt. Ltd. · *India*

iOS + Android	5	Business	Live
PLATFORMS	LANGUAGES	CATEGORY	STATUS

Flutter · Dart · Riverpod · Clean Architecture · iOS + Android

A cross-platform procurement and trading platform for farmers, traders and agribusinesses. Users trade crops on the spot or schedule future contracts, manage warehouse locations and settle payments with staged transparency.

MY CONTRIBUTION

- Delivered a single Flutter codebase shipping to both the App Store and Play Store.
- Built negotiation and counteroffer flows where both parties iterate on price and quantity before an order is locked.
- Implemented spot and futures order management with full lifecycle tracking.
- Added warehouse management so logistics destinations persist across orders.
- Integrated advance and final payment stages with transparent settlement states.
- Applied Riverpod for state management within a Clean Architecture structure.
- Shipped multilingual support across English, Bengali, Hindi, Marathi and Telugu.

App Store → **apps.apple.com/in/app/fnprocure/id6752323882**

PROJECT 03

Scout Connect

Field survey and crop inspection tooling

Farmneed Agribusiness Pvt. Ltd. · *India*

5K+	Agri scouts	Communication	Live
INSTALLS	USERS	CATEGORY	STATUS

Native Android · Kotlin · Java · GPS · Camera · Offline Sync

A field application connecting agricultural scouts with their portfolio farmers. Scouts get full visibility over assigned farmers and report field observations through a structured digital interface, replacing paper-based survey workflows.

MY CONTRIBUTION

- Built GPS-tagged farmer surveys and crop inspection forms for in-field use.
- Implemented a camera and image upload pipeline resilient to intermittent network, with queued retry rather than data loss.
- Developed portfolio management so each scout sees only their assigned farmers.
- Added a direct sell-your-produce flow with integrated secure online payments.
- Introduced an Orders and Offers section for purchase and discount management.
- Shipped notification and community features, and resolved an infected-farmer list defect affecting field reporting accuracy.

Google Play → **play.google.com/store/apps/details?id=com.farmneedscout**

PROJECT 04

Shopini Express

Nationwide shipment booking and tracking, Iraq

The Virtual World · Basra, Iraq

10K+	3.9 / 5	176	All Iraq
INSTALLS	RATING	REVIEWS	COVERAGE

Android · Java · Firebase · Barcode Scan · Arabic RTL

A logistics application providing premium shipping across every governorate of Iraq, with delivery inside 48 hours. The app covers door-to-door service, supplier pickup with quality review, cargo insurance and live shipment tracking for both individuals and corporate accounts.

MY CONTRIBUTION

- Built shipment booking and the end-to-end delivery tracking interface.
- Implemented Firebase-backed real-time status updates so customers see shipment state change without manual refresh.
- Developed account and balance views for merchant users managing many shipments.
- Added a barcode scan feature for faster parcel handling.
- Delivered a fully Arabic, right-to-left interface with correct layout mirroring.
- Addressed performance on slow connections through caching and background sync.

Google Play → **play.google.com/store/apps/details?id=com.shopiniexpress**

PROJECT 05

Shopini Driver

Driver-side route tracking and delivery execution

The Virtual World · Basra, Iraq

Android	Shopini Express	Logistics	Live
PLATFORM	PAIRS WITH	CATEGORY	STATUS

Flutter · Dart · Google Maps · Background Location · Firebase

The driver-facing counterpart to Shopini Express. Drivers receive assigned deliveries, navigate routes and push live status updates that feed directly into the customer tracking experience.

MY CONTRIBUTION

- Built driver workflows covering job assignment, acceptance, pickup confirmation and proof of delivery.
- Integrated Google Maps for route display and turn-by-turn navigation handoff.
- Implemented background location tracking tuned to preserve battery while keeping customer-facing ETAs accurate.
- Wired real-time delivery status propagation between driver and customer apps.
- Handled Arabic localisation consistently with the customer application.

Google Play → **play.google.com/store/apps/details?id=com.shopiniexpress.shopinidriver**

PROJECT 06

Basra Amazon

Beauty and skincare e-commerce, iOS and Android

Altatweer · Iraq

10K+	4.7 / 5	iOS + Android	Shopping
INSTALLS	RATING	PLATFORMS	CATEGORY

Flutter · Dart · Payment Gateway · Arabic RTL · iOS + Android

A cross-platform e-commerce application for beauty, skincare, haircare and fragrance products across multiple brands, built in Flutter and shipped to both the App Store and Play Store.

MY CONTRIBUTION

- Built product browsing across skincare, makeup, haircare, fragrance and beauty tool categories with an advanced search and filtering layer.
- Implemented cart, checkout and order tracking as a single coherent flow.
- Integrated secure payment gateway handling with multiple payment options.
- Delivered promotions, discounts and promo code redemption, including fixing promo code defects found in production.
- Built multiple delivery option selection tied to customer location.
- Shipped a full Arabic RTL interface across both platforms.

Google Play → **play.google.com/store/apps/details?id=com.store.basraamazon**

App Store → **apps.apple.com/iq/app/basra-amazon/id6736564329**

PROJECT 07

Fusteka Group

Brand catalogue, promotions and competitions platform

The Virtual World · Basra, Iraq

500K+	4.1 / 5	1,530	Food & Drink
INSTALLS	RATING	REVIEWS	CATEGORY

Android · Flutter · Firebase · OTP Auth · Arabic RTL

The highest-reach application in this portfolio. A consumer brand platform for Fusteka and Jekor covering the full product catalogue, official pricing, live promotions, competitions and giveaway participation.

MY CONTRIBUTION

- Built the product catalogue and official pricing browse experience across both brand lines.
- Implemented promotions and discount surfacing with timed offer handling.
- Developed competition entry and gift and giveaway participation flows.
- Built OTP-based registration and authentication.
- Delivered a news and updates feed keeping users current on brand activity.
- Shipped an Arabic-first RTL interface serving a 500K+ install base.

Google Play → **play.google.com/store/apps/details?id=com.fustekagroup**
